

Developer Portfolio Website

Full Stack Mini Project Report

Student Name	Krushna Keshav Manthalkar
Project Type	Individual Full Stack Mini Project
Project Title	Krushna Manthalkar — Developer Portfolio
Frontend	HTML5, CSS3, JavaScript
Backend	Node.js, Express.js
Database	MongoDB Atlas with Mongoose
Deployment	Vercel (portfolio) + Render (backend)

1. Project Overview

This project is a responsive full-stack developer portfolio website created to professionally present the developer's profile, technical skills, education, experience, projects, certifications, resume and contact information. The application combines a static frontend with a Node.js and Express.js backend and MongoDB Atlas database integration.

2. Objective

The main objective was to build and deploy a professional portfolio that satisfies the mini-project requirements while demonstrating frontend development, backend API development, database integration, responsive design and cloud deployment.

3. Technology Stack

- Frontend:** HTML5, CSS3 and JavaScript
- Backend:** Node.js and Express.js
- Database:** MongoDB Atlas and Mongoose
- Tools:** Visual Studio Code, Git, GitHub and Thunder Client
- Deployment:** Vercel and Render

Project repository structure contains separate **frontend** and **backend** folders, a screenshot/evidence folder and README.md documentation.

Features & Implementation

4. Portfolio Sections

The website includes Home and navigation, About Me, Technical Skills, Education, Experience, Projects, Certifications and Contact sections. The home section also provides project navigation and a downloadable resume.

5. Technical Skills Presented

The portfolio presents Java, JavaScript, HTML, CSS, Node.js, Express.js, Spring Boot, MongoDB, MySQL and Git & GitHub.

6. Project Showcase

Project	Description	Technologies
Lost & Found Portal	Web platform for reporting, managing and tracking lost and found items.	Node.js, Express.js, MongoDB
Developer Portfolio	Responsive portfolio showcasing profile, skills, education, projects and professional information.	HTML, CSS, JavaScript, Node.js
Java / Spring Boot Project	Backend application developed to practice Java, Spring Boot and MySQL.	Java, Spring Boot, MySQL

7. Responsive Design

CSS media queries are used to adapt the navigation, project cards, spacing, typography and buttons for desktop, tablet and mobile screen sizes. Desktop and mobile screenshots are included as project evidence.

8. Resume and Professional Links

A downloadable resume is included in the frontend assets. The portfolio also provides GitHub and LinkedIn profile links.

9. Certifications and Experience

The portfolio includes Java Programming and Full Stack Development Training certifications and lists Full Stack Development Intern experience at Quillance Infotech Pvt. Ltd.

Backend, Database & Deployment

10. Contact Form Implementation

The Contact section collects the visitor's name, email, subject and message. JavaScript sends the form data as a JSON POST request to the deployed backend contact endpoint. The backend processes the request and stores the message in MongoDB Atlas.

11. Backend API

API route: POST /api/contact

Live backend base URL: <https://krushnamanthalkar-developerportfolio.onrender.com/>

12. Database Integration

MongoDB Atlas is used as the cloud database. Contact messages are stored in the contacts collection. The database connection string is kept in an environment variable and is not exposed in the public repository.

13. Deployment

Component	Platform	Live URL
Portfolio Frontend	Vercel	https://krushna-manthalkar-developer-portfo.vercel.app/
Backend API	Render	https://krushnamanthalkar-developerportfolio.onrender.com/
Source Repository	GitHub	https://github.com/KrushnaManthalkar/KrushnaManthalkar_DeveloperPortfolio

14. Verification Evidence

The submission repository contains evidence screenshots for Desktop View, Mobile View, Contact Form submission and Database records. These demonstrate the responsive interface and the successful flow from the contact form to the database.

15. Security / Configuration

The MongoDB connection string is stored through environment configuration rather than committed to GitHub. The README also documents the environment variable setup for local execution.

Screenshots, Testing & Conclusion

16. Submission Evidence

Evidence	File / Location
Desktop View	screenshot/Desktop_screenshot.png
Mobile View	screenshot/Mobile_Screenshot.png
Contact Form	screenshot/Contact_Form_Evidence.png
Database	screenshot/Database_Evidence.png

17. Testing Checklist

- Portfolio opens from the deployed Vercel URL.
- Navigation links point to the relevant portfolio sections.
- Resume is available through the Download Resume button.
- GitHub and LinkedIn links are included.
- Contact form sends data to the backend API.
- Submitted contact data is stored in MongoDB Atlas.
- Desktop and mobile views were captured as evidence.
- Project source code and README are available in the GitHub repository.

18. Conclusion

The Developer Portfolio project successfully combines a responsive frontend, backend contact API, cloud database and live deployment into one full-stack mini project. It provides a professional way to present the developer's profile while demonstrating practical skills in HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Git/GitHub and deployment platforms.
